

Heavy-Duty Wheel Loader for Mining

This heavy-duty wheel loader is designed for mineral extraction and handling. It features a large-capacity bucket with reinforced teeth and robust hydraulic cylinders for precise control and lifting power.

Product Overview

Heavy-Duty Mining Performance

This heavy-duty wheel loader is specifically engineered for high-intensity mineral extraction and material handling operations. Built with high-strength steel, the machine ensures exceptional durability and longevity even in the most demanding mining environments. It features a powerful engine optimized for high torque and robust hydraulic systems for precise, efficient bucket control.

Technical Specifications

Bucket Design

- Large-capacity bucket
- Reinforced teeth for efficient scooping

Construction Material

High-strength steel

Performance Metrics

Key Operational Metrics

1 Robust

Hydraulic System

1 High

Engine Torque

Operational Features

Operator Cabin

Comfort-focused, High visibility, Safety-oriented

Terrain Handling

Heavy-duty tires for traction and stability on uneven terrain
