

Heavy-Duty Wheel Loader

This heavy-duty wheel loader is engineered for efficient material handling and loading tasks. With a robust hydraulic system, it delivers exceptional lifting capacity and precise control.

Product Overview

High-Efficiency Performance

The SL80W loader is a heavy-duty construction vehicle engineered for maximum efficiency and energy savings. Utilizing advanced hydraulic drive and control technologies, it ensures reliable operation in demanding environments. The system features a high-capacity bucket and an optimized design, providing users with increased productivity, precise control, and superior breakout force for heavy-duty material handling.

Technical Specifications

Key Operational Benefits

- High energy-saving efficiency
- Light and flexible operations
- Reliable structural quality
- Optimized wheelbase for stability

Hydraulic System

Hydraulic Drive, Hydraulic Control, Double-pump Convergence

Steering Technology

Priority flow amplifying valve for light steering

Performance Metrics

Machine Capabilities

1 High

Breakout Force
