

Heavy-Duty Wheelbarrow with Pneumatic Tire

This heavy-duty wheelbarrow is designed for efficient material transport in agricultural and construction settings. It features a robust steel frame for durability and a high-capacity yellow bucket for handling various loads.

Product Overview

Built for Heavy-Duty Performance

This heavy-duty wheelbarrow is engineered for efficient material transport in demanding agricultural and construction environments. It features a robust metal tray and a durable steel frame designed to handle substantial loads with ease. With its specialized pneumatic tire, the unit ensures smooth maneuverability across uneven terrain, while ergonomic handles minimize operator strain during intensive hauling tasks.

Technical Specifications

Load Capacity	5 kg
Water Capacity	9 L
Sand Capacity	0.4 CBF

Materials and Design

Color Customization
Customer Requirements

Tray Material	Metal
Wheel Type	Solid Wheel

Logistics and Origin

Place of Origin	Shandong, China
Model Number	wb0102
