

Heavy Machinery Skates with Adjustable Pole

These heavy machinery skates are designed for the easy movement of heavy loads. They feature durable PU or steel wheels for smooth rolling and include an adjustable pole and 360-degree turntable.

Product Overview

Heavy Machinery Skates with Adjustable Pole

These heavy machinery skates are essential tools for the safe and efficient transport of large industrial equipment. Designed for high-load capacity, the system includes a flexible configuration with a draw bar and two sets of cargo trolleys, allowing for precise directional control. The integrated adjustable pole and 360-degree swiveling turntables ensure maneuverability in tight factory environments.

Technical Specifications

Pole Length

2 m

Minimum Length

3 m

Maximum Length

Maneuverability

- 360-degree swiveling turntable
- Flexible directional control
- Detachable components
- Integrated draw bar

Wheel Material

PU, Steel

Configuration

Included Components

Component	Function
Adjustable Pole	Connects skates for unified movement
Cargo Trolleys	Two sets for load distribution
Fixed Rod	Stabilizes straight-line movement
