

Heavy Machinery Transport Flatbed Trailer

This flatbed semi-trailer is designed for transporting heavy construction machinery. It features a robust steel frame and multiple axles for load distribution and stability.

Overview

Heavy-Duty Transport Solution

This flatbed semi-trailer is engineered specifically for the secure transport of heavy construction machinery, including loaders, excavators, and bulldozers. Featuring a robust steel frame construction and a specialized load-distribution design, it ensures stability and safety during transit. It is an ideal asset for demanding applications in construction, mining, and large-scale infrastructure projects.

Technical Specifications

Construction Material	Robust Steel Frame
Finish	Blue Painted
Key Features	Multiple Axles, Side Reflectors, Headboard

Applications

Suitable Industries

- Construction
- Mining
- Infrastructure Projects

Compatible Machinery

Loaders • Excavators • Bulldozers
