

Heavy Machinery Transport Trailer

This heavy-duty flatbed trailer is designed for transporting construction machinery. It features a robust steel frame, multiple axles, and integrated tie-down points for secure equipment transport.

Overview

Heavy-Duty Transport Solution

This heavy-duty flatbed trailer is specifically engineered for the reliable transport of construction machinery, including loaders, excavators, and bulldozers. Featuring a robust steel frame construction and an optimized low deck height, it ensures both structural durability and ease of loading. Integrated tie-down points and comprehensive safety lighting provide a secure and compliant solution for demanding logistics operations.

Construction & Design

Frame Material	Robust Steel
Deck Profile	Low deck height

Performance & Safety

Axle Configuration	Multiple axles for enhanced load distribution
Safety Features	Integrated tie-down points, Safety reflectors, Lighting system

Applications

Compatible Equipment

- Loaders
- Excavators
- Bulldozers
