

Heavy Truck Cabin with Double Bedrooms

This heavy truck cabin features a spacious interior with double bedrooms for driver comfort during long journeys. The flat floor design enhances mobility and driving comfort.

ADDITIONAL IMAGES

Product Overview

Aerodynamic exterior design built for fuel efficiency and durability.

Designed for Long-Haul Comfort

The PW18JL heavy truck cabin is engineered for long-haul transportation, featuring a spacious flat-floor design that prioritizes driver comfort and interior versatility. Its aerodynamic profile significantly reduces drag to enhance fuel efficiency, while the robust construction ensures durability in demanding operating environments. The cabin includes a double bedroom configuration, providing ample rest space for drivers during extended journeys.
