Product Overview

Heavy Vehicle Brake Slack Adjuster

This essential brake component is designed for heavy-duty air brake systems, ensuring precise clearance between brake shoes and drums. Engineered for durability, these adjusters are available in both manual and automatic configurations to accommodate diverse fleet requirements. They provide consistent braking performance and contribute to vehicle safety and long-term regulatory compliance.

Technical Specifications

Key Features

- Corrosion-resistant coating
- Robust heavy-duty design
- Flexible mounting configurations
- Minimal maintenance requirements

Adjustment Mechanism	Manual, Automatic
Reference ID	FH20E0333
Construction Material	Forged Steel
