

Hedge Trimmer Replacement Blades

These hedge trimmer blades are precision-engineered for efficient and clean cuts. They are constructed from high-strength steel, ensuring durability and long-lasting performance.

Product Overview

Precision Hedge Trimmer Blades

These high-performance hedge trimmer blades are engineered for efficient and clean cutting of garden foliage and branches. Constructed from high-strength 65Mn steel, they offer exceptional durability and longevity for demanding trimming tasks. With optimized tooth geometry, these blades ensure precise results, making them an ideal choice for both professional landscaping and residential garden maintenance.

Technical Specifications

Material	65Mn Steel
