Product Overview

Versatile Shelling Solution

This high-efficiency shelling machine is engineered to process hemp seeds, spelt, and coffee beans with precision. It features a robust three-roller huller head design that effectively simulates double-pass processing for superior results. Built for durability and consistent performance, this machine is an ideal choice for small to medium-scale agricultural and food processing operations.

Technical Specifications

Compatible Products

- Hemp Seed
- Spelt
- Coffee Bean

Huller Head Configuration

Three-roller system

Efficiency Equivalent

Two-pass rubber roller sheller performance

Construction Materials

Special Glass, Quenched Manganese Steel

Service & Support

Warranty Policy

The warranty covers defects caused by machine design. Replacement parts are provided free of charge during the warranty period for design-related failures. Technical support is available for issues arising from user-related factors.

Warranty Period

1 year

Maintenance

Lifelong maintenance support
