

HEPA Air Purifier Filter

This high-efficiency particulate air (HEPA) filter is designed for air purifiers. Its honeycomb structure increases surface area and improves filtration efficiency for dust, pollen, and other airborne particles.

Product Overview

High-Efficiency Filtration Solution

This high-efficiency particulate air (HEPA) filter is engineered to deliver superior indoor air quality by effectively removing volatile organic compounds (VOCs). It features an advanced honeycomb structure that maximizes surface area, ensuring high filtration efficiency while maintaining low air resistance. Designed for durability and performance, this filter captures dust, pollen, pet dander, and mold spores to create a healthier environment.

Technical Specifications

Design Features

- Honeycomb structure for increased surface area
- Low air resistance design
- Durable black frame construction
- Dense multi-layered filter media

Filtration Capabilities

Dust, Pollen, Pet Dander, Mold Spores, VOCs

Manufacturing & Services

Service Capabilities

ODM Available • OEM Available • Bulk Customization

Industry Experience

15 Years

Years of Experience
