Product Overview

Advanced Air Purification System

This high-performance air purifier is engineered for versatile use in homes, offices, and hotel environments. It features a comprehensive 7-layer filtration system, including HEPA and activated carbon filters, to effectively remove dust, pollen, smoke, pet dander, and harmful gases like formaldehyde. With integrated UV sterilization and ionizer technology, the unit ensures a cleaner, healthier breathing environment, while the intuitive touchscreen display provides real-time air quality monitoring.
