Overview

High-Efficiency Herbal Pulverizer

The ZFJ Series Herbal Pulverizer is a professional-grade grinding solution designed for the pharmaceutical, food, and chemical industries. Engineered to handle diverse materials regardless of viscosity, hardness, or fiber shape, this machine excels at processing fibrous and oily herbal medicines. Built to GMP standards using high-quality stainless steel, it ensures a hygienic, dust-free production environment with easy operation and maintenance.

Key Features

Operational Highlights

GMP Standard Compliant, Stainless Steel Construction, No Sieve or Screen Required, Dust-Free Operation, Cool Air Grinding, Low Noise

Technical Specifications

Grinding Mechanism

- High-speed rotating blades
- Adjustable grading wheel and plate
- Negative pressure material discharge
- Integrated dust collection system
