

Hermetic Compressor for Water Coolers

This hermetically sealed compressor is designed for water coolers. It features thermal overload protection, a 220V-60Hz 1PH power supply, and R134a refrigerant compatibility.

Product Overview

Designed for Efficiency and Stability

The NV Series hermetic compressor is specifically engineered for water cooler applications, utilizing unique technology to ensure quiet and stable operation. These compressors are built for reliability in both household and commercial cooling systems. With features like thermal overload protection and compatibility with R134a refrigerant, this series offers a robust solution for your cooling needs.

Technical Specifications

Refrigerant	R134a
Motor Type	RSIR
Cooling Type	ST

Performance Metrics

Model Performance Comparison

Model	Voltage	Frequency	Cooling Capacity (-23.3°C)	COP (-23.3°C)
NH26R45A	220V-240V	50Hz	56W	0.82
NH26R26M	220V-240V	60Hz	66W	1.0

Certifications & Features

Key Features	Hermetically Sealed, Thermal Overload Protection, Quiet Operation, RoHS Compliant
