Product Overview

High-Efficiency Cooling Performance

This hermetically sealed compressor is engineered specifically for reliable operation in water dispensers and light refrigeration units. Featuring optimized energy efficiency and robust construction, it ensures consistent cooling performance for domestic and commercial applications. The unit is built to stringent international safety and environmental standards, offering peace of mind through comprehensive quality certifications.

Technical Specifications

Model Number	QD30LW
Refrigerant	R134a
Voltage/Frequency	220V/50Hz

Performance Metrics

Cooling Capacity

68 W

Cooling Capacity

Compliance and Standards

Quality Certifications	CCC, CE, CB, VDE, UL, ROHS
