Product Overview

Professional Cooling Performance

This hermetically sealed compressor is engineered specifically for reliable operation in water dispensers and light commercial refrigeration systems. It utilizes R134a refrigerant to ensure consistent cooling performance in a compact form factor. The unit is designed for broad compatibility and adheres to international safety and environmental standards.

Technical Specifications

Cooling Capacity

86 W

Cooling Capacity

Electrical Input 220V / 50Hz

Refrigerant R134a

Model Identifier QD36LW

Certifications

Quality Certifications CCC, CB, CE, ROHS, VDE, UL
