Product Overview

Hermetically Sealed Refrigeration Compressor

This hermetically sealed refrigeration compressor is engineered for reliability and high efficiency in light commercial refrigeration systems. Designed to support a 130L freezer capacity, it offers consistent performance and robust construction. It operates at 220V/50Hz and is fully compliant with major international safety and environmental standards.

Technical Specifications

Cooling Capacity

131 W

Cooling Capacity

Power Supply	220V / 50Hz
Horse Power	1/6 HP
Refrigerant	R134a

Application

Recommended Freezer Size	130 L
--------------------------	-------

Compliance

Quality Certifications	CCC, CB, CE, ROHS
------------------------	-------------------
