

# Hex Head Lag Screw

This hex head lag screw is designed for heavy-duty fastening in wood applications. It features a coarse thread pattern for strong holding power and a hex head for easy installation.

## Product Overview

### High-Strength Lag Screw

This hex head lag screw is engineered for heavy-duty fastening in demanding wood applications. Designed with a coarse thread pattern, it ensures superior holding power and structural integrity for timber framing and general wood construction. Its robust steel construction and corrosion-resistant finish provide long-lasting performance in various project environments.
