

Hex Head Metal Roofing Nails with Washers

These metal nails feature hexagonal heads and plastic washers, making them suitable for roofing and construction. Their threaded shank ensures enhanced grip, complemented by a corrosion-resistant coating.

Product Overview

Professional Grade Roofing Nails

These hex head metal roofing nails are engineered for high-performance roofing and general construction applications. Featuring a specialized threaded shank, they provide superior holding power and enhanced grip compared to standard smooth-shank fasteners. Each nail is equipped with an integrated washer and finished with a durable, corrosion-resistant coating to ensure long-term structural integrity in outdoor environments.

Technical Specifications

Primary Applications

- Metal Roofing
- General Construction
- Outdoor Fastening

Head Style	Hexagonal
Key Features	Threaded Shank, Corrosion-Resistant Coating, Integrated Washer
