

HEX Rock Bucket for Excavators and Loaders

This heavy-duty HEX rock bucket is designed for efficient material handling. It features a robust construction with reinforced steel for enhanced durability and extended service life.

Product Overview

Heavy-Duty HEX-Rock Bucket

The HEX-Rock Bucket is a heavy-duty attachment engineered for efficient material handling in demanding construction and industrial environments. Featuring a robust construction with reinforced steel, it is designed for enhanced durability and an extended service life. The unique HEX design optimizes material scooping and significantly reduces spillage, ensuring maximum productivity and reliability for excavators and loaders in rock excavation and heavy loading applications.

Technical Specifications

Key Design Features

- Reinforced steel construction
- HEX design geometry
- Spillage reduction profile

Durability Rating

Heavy-Duty • Reinforced

Application Compatibility

Excavators, Loaders

Primary Use Case

Rock excavation and material loading
