

Hexagon Head Cap Screw

Precision-engineered hexagon screws ensure secure fastening in mechanical applications. These screws are manufactured from high-grade steel, offering durability and corrosion resistance across various sizes.

Product Overview

Precision-Engineered Fastening

These hexagon head cap screws are precision-engineered to provide secure and reliable fastening across a wide range of mechanical applications. Manufactured from high-grade steel, they offer exceptional durability and built-in corrosion resistance for long-lasting performance. They are an ideal solution for demanding environments found in the machinery, automotive, and construction industries.

Technical Specifications

Material	High-grade steel
Key Features	Corrosion Resistant, High Durability, Precision Engineered

Applications

Primary Industries

- Machinery
- Automotive
- Construction
