Product Overview

Professional Grade Hexagonal Nuts

These hexagonal metal nuts are designed for heavy-duty construction and anchoring applications. Engineered for durability, they serve as essential components within self-drilling anchor systems. Their robust design ensures reliable performance in demanding environments, making them a staple for professional infrastructure projects.

Technical Specifications

Compatible Anchor Bar Types

- R25
- R32
- R38
- R51
- R63
- R76
- T30
- T40
- T52
- T73
- T76
- T103
- T111
- T127

System Components

Available Drill Bit Options

Bit Type	Material/Design
Cross Cut Bit	Carbide
Button Bit	Carbide
Cross Cut Bit	Steel
Button Bit	Steel
Clay Sand Bit	Steel

Associated System Parts

Self Drilling Anchor Bar, Coupler, Drill Bit, Plate
