

HID Xenon Headlight Bulb

High-intensity discharge (HID) Xenon headlight bulb designed for automotive lighting. It produces bright, white light for enhanced visibility and improved road safety.

Product Overview

High-Performance HID Xenon Lighting

This High-Intensity Discharge (HID) Xenon headlight bulb is engineered for superior automotive lighting performance. Featuring a gas-filled glass chamber with precise electrodes, it delivers a bright, white light output that significantly enhances visibility during nighttime driving. Designed for both upgrades and replacements, this bulb offers improved energy efficiency and a longer operational lifespan compared to traditional halogen alternatives.

Technical Specifications

Certification/Marking

E210

Key Advantages

- Enhanced nighttime visibility
- Improved energy efficiency
- Extended operational lifespan
- Standard base for easy installation

Technology Type

HID Xenon (High-Intensity Discharge)
