

High-Attenuation Earmuffs for Noise Reduction

These earmuffs offer high attenuation, protecting hearing in noisy environments. They feature an adjustable headband, soft ear cushions, and durable construction for comfortable, long-lasting use in various industrial and construction settings.

Product Overview

High-Attenuation Hearing Protection

These high-attenuation earmuffs are engineered to provide optimal hearing protection in demanding, high-noise environments. Designed with user comfort in mind, they feature an adjustable headband and soft ear cushions suitable for extended wear. Their durable construction ensures long-lasting performance across various industrial and construction applications.

Key Features

Core Features

- High-attenuation noise reduction
- Adjustable headband for custom fit
- Soft ear cushions for comfort
- Durable, long-lasting construction

Applications

Suitable Environments

Industrial, Construction Sites, High-Noise Areas
