

# High-Capacity Lead-Free Reflow Soldering Machine

This high-capacity reflow soldering machine is designed for lead-free soldering processes. It features a multi-zone heating system, a conveyor system, and a user-friendly interface for efficient PCB assembly.

## Overview

### High-Capacity Lead-Free Reflow Soldering

This high-capacity reflow soldering machine is engineered specifically for modern lead-free soldering processes. It utilizes an advanced multi-zone heating system to ensure precise temperature control and uniform heat distribution across the PCB. Designed for high-volume manufacturing environments, it features an integrated conveyor system for continuous, efficient operation.

## Technical Specifications

Model Identifier	RF-620-LF
Process Compatibility	Lead-Free Soldering
Heating System	Multi-zone
Operation Mode	Continuous conveyor

## Features

### Key Features

- Precise temperature control
- Uniform heat distribution
- High-volume capacity
- User-friendly interface
- Real-time process monitoring
