

High-Capacity Mobile Crane

This mobile crane is designed for heavy lifting and construction applications. It features a telescopic boom, multiple axles for stability, and a powerful engine for maneuverability.

Overview

High-Capacity Mobile Crane

This high-capacity mobile crane is engineered for demanding heavy lifting and construction applications. It features a robust telescopic boom and multiple axles to ensure exceptional stability and maneuverability on uneven terrain. Equipped with advanced safety systems and precise controls, it is a reliable solution for complex construction sites, large-scale infrastructure projects, and heavy industrial settings.

Technical Specifications

Boom Type	Telescopic
Axle Configuration	Multiple axles

Features

Safety Systems Advanced Safety Systems • Precise Controls	
Key Capabilities	Heavy Lifting, Construction, Infrastructure, Industrial Use
