

# High-Carbon Steel Board Saw

This board saw features a high-carbon steel blade, ensuring durability and precision in cutting tasks. Designed with a reinforced back, it minimizes blade flex to provide straight, accurate cuts on boards and panels.

## Overview

### Professional Grade Board Saw

This rigid board saw is engineered for precision and durability, featuring a high-carbon steel blade that ensures long-lasting performance. Designed with a reinforced back to minimize blade flex, it guarantees straight, accurate cuts every time. The ergonomic handle is crafted to provide a comfortable and secure grip, effectively reducing user fatigue during extended cutting tasks.

## Technical Specifications

### Primary Applications

- Cutting boards
- Panel cutting
- Precision woodworking

Blade Material	High-Carbon Steel
Design Features	Reinforced Back, Ergonomic Handle, Anti-Flex Design
