

High-Carbon Steel Cultivator Sweep Blade

This cultivator sweep blade is made from high-carbon steel. It is designed for effective soil cultivation and weed control and features two square mounting holes for secure attachment.

Product Overview

High-Carbon Steel Cultivator Sweep Blade

This high-carbon steel cultivator sweep blade is engineered for high-performance soil cultivation and efficient weed control. Its robust construction ensures longevity even when used in challenging gardening environments. Featuring a dual-hole mounting system, it provides a stable and secure attachment to various agricultural equipment.

Technical Specifications

Material Composition	High-carbon steel
Mounting Configuration	Dual square mounting holes

Application

Primary Applications	Soil Cultivation, Weed Control, Agriculture, Gardening
Soil Suitability	Versatile compatibility with various soil types
