

High Conductivity Audio-Visual Copper Wire

This high-conductivity copper wire is designed for audio and video applications. It features low signal loss, high tensile strength, and excellent flexibility, making it suitable for a wide range of audio-visual equipment and installations.

Product Overview

High-Performance Audio-Visual Connectivity

This high-conductivity copper wire is engineered specifically for premium audio and video transmission. It minimizes signal loss to ensure high-fidelity performance across professional A/V installations. With superior tensile strength and flexibility, this cable is designed for ease of deployment in complex setups.

Technical Specifications

Key Performance Attributes

- Low signal loss
- High tensile strength
- Excellent flexibility

Conductor Material	High Conductivity Copper
Primary Application	Audio, Video, A/V Installation

Logistics and Handling

Packaging

Large Spool

Handling	Designed for efficient handling and deployment
