

# High-Definition IP Security Camera System

This IP security camera system delivers high-definition screen resolution, providing clear and stable images. Its IP system products offer flexibility and expandability, making them suitable for various surveillance applications.

## Why choose COMPETITION ?

- Unified indoor monitor for both villa and building system to save inventory pressure
- Support multiple villas and buildings in one system
- Easy connection with short circuit protector
- Non-polarize connected
- Upgrade to new version via cloud connection
- AI smart home system compatible
- Individual private cloud
- Customized app design

## Overview

### High-Definition IP Security System

This advanced IP over 2-wire security system revolutionizes surveillance by allowing high-definition digital connectivity while utilizing existing building wiring. It offers significant flexibility and scalability, making it ideal for both villa and multi-building installations. With cloud-based software updates and AI smart home compatibility, this solution ensures modern, future-proof security management.

## System Features

### Key Capabilities

- IP over 2-wire digital connectivity
- Cloud platform integration
- AI smart home system compatible
- Short circuit protection
- Non-polarized connection
- Private cloud storage support

### Viewing Angle

**120 °**
