

High-Density Computer Cable

This is a high-density, low-profile computer cable designed for reliable signal transmission. It is ideal for internal connections in computers, peripherals, and other electronic equipment.

Product Overview

High-Density Connection Solution

This high-density, low-profile computer cable is engineered for reliable signal transmission within space-constrained electronic devices. Featuring a fine-pitch design, it maximizes space efficiency while ensuring secure connections through precision-molded housing. With gold-plated contacts, it delivers optimal conductivity, making it an ideal choice for internal wiring in computers and peripherals.

Technical Specifications

Primary Applications

- Internal computer connections
- Peripheral equipment
- Compact electronic devices

Contact Material	Gold-plated
Design Features	High-density, Low-profile, Fine-pitch, Precision-molded
Model Identifier	0.5D1-ePLF
