

# High-Density Durable Wallboard

This high-density wallboard is suitable for various construction applications. It provides a smooth, paintable surface, ideal for interior walls in residential and commercial buildings.

## Product Overview

### High-Density Durable Wallboard

This high-density, durable wallboard is engineered for versatile construction applications in both residential and commercial sectors. It provides superior structural strength and excellent insulation properties, making it an ideal choice for interior wall systems. The board features a smooth, paintable surface and is specifically resistant to moisture and mold, ensuring long-lasting performance and reliability in various environments.

## Key Features

### Suitable Applications

- Residential interior walls
- Commercial building construction
- Moisture-prone areas
- General interior finishing

### Performance Attributes

High Density, Moisture Resistant, Mold Resistant, Durable, Paintable Surface
