

High-Density Fiber Distribution Frame for MPO Connectivity

This high-density fiber distribution frame is designed for MPO-level connectivity. It provides a structured and efficient solution for managing and distributing fiber optic cables in data centers and telecommunication environments.

Product Overview

High-Density MPO Distribution Solution

This high-density fiber distribution frame is engineered to provide a robust and scalable solution for managing MPO-level connectivity in demanding data center and telecommunication environments. Featuring a modular design, it allows for flexible capacity adjustments, ensuring efficient space utilization and simplified cable management. The high-end cabinet construction combines durability with a professional aesthetic, making it an ideal choice for modern network infrastructure.

Physical Specifications

Dimensions (H x W x D)

2000 mm

Height

800 mm

Width

Design & Features

Key Features

- Ultra-high density capacity
- Modular design for easy expansion
- Advanced cable management structure
- High-end cabinet aesthetics

Connectivity Type

MPO
