

High-Efficiency Air Filter

This high-efficiency air filter is designed for optimal filtration and extended service life. It provides superior protection against dust, pollen, and other airborne contaminants, ensuring clean air intake and improved engine performance.

Product Overview

High-Efficiency Filtration

This high-efficiency air filter is engineered to provide optimal filtration and extended service life for generator systems. Featuring robust construction with pleated filter media and durable end caps, it offers superior protection against dust, pollen, and airborne contaminants. This design ensures clean air intake, which is essential for maintaining consistent engine performance in industrial applications.

Compatibility & Application

Compatible Equipment

Cummins Generator

Technical Features

Application Scope

Industrial • Automotive

Construction Details

Pleated Media, Durable End Caps, High-Efficiency
