

High-Efficiency Air Purifier with HEPA Filter

This air purifier has a CADR of 510m³/h (300cfm). It is 99.97% effective for particles as small as 0.3 microns and is suitable for a room size of 530 square feet.

Product Overview

High-Performance Air Purification

This high-efficiency air purifier is engineered to significantly improve indoor air quality by removing dust, pollen, pet dander, and mold spores. It utilizes a robust multi-stage filtration system, including a HEPA filter, to capture airborne particles as small as 0.3 microns. Designed for versatility, the unit features multiple fan speeds and quiet operation, making it an ideal solution for residential and office environments.

Filtration System

Filtration Stages

- Pre-filter
- HEPA filter
- Activated carbon filter

Particle Capture Efficiency

0.3 microns

Minimum Particle Size
