

High-Efficiency IE2 Three-Phase Asynchronous Motor

This YE2 series three-phase asynchronous motor offers high efficiency, complying with the IEC60034-30 standard. With a frame size of H160-355 and power ranging from 11kW to 315kW, it is suitable for use in fans, water pumps, and air compressors.

Product Overview

High-Efficiency IE2 Three-Phase Asynchronous Motor

This three-phase asynchronous motor is engineered for high performance and energy efficiency, meeting the strict IE2 standards for industrial operations. Constructed with a robust cast iron housing, it offers superior durability with dust-proof, vermin-resistant, and corrosion-resistant properties. Designed for reliability, this motor ensures smooth operation with low vibration in demanding S1 work duty environments.

Technical Specifications

Efficiency Class

IE2

IP Rating
