

High-Efficiency LED Street Light

This LED street light is designed for high efficiency and optimal illumination. It features a durable, weather-resistant housing suitable for streets, parking lots, and pathways.

Product Overview

High-Efficiency LED Street Lighting

The ZD13 Series represents a professional-grade LED solution engineered for optimal illumination in outdoor environments. Designed with a robust, weather-resistant housing, this series ensures long-term durability and reliable performance in demanding conditions. Its energy-efficient architecture makes it an ideal choice for municipal streets, expansive parking lots, and pedestrian pathways requiring high-quality light distribution.
