

High-Efficiency Solar Module

This high-efficiency solar module is designed for residential and commercial applications. It features robust construction for long-term reliability and performance and is engineered to withstand harsh environmental conditions, providing consistent power output.

Product Overview

High-Efficiency Energy Solution

This high-efficiency solar module is engineered to provide superior energy yield for both residential and commercial applications. Built for long-term reliability, the unit demonstrates exceptional durability against harsh environmental conditions. Its optimized design ensures consistent power output for both grid-tied and off-grid configurations, making it a robust choice for professional energy projects.

Technical Specifications

Electrical Performance

330 W

Max Power

37.5 V

Voltage at Max Power

8.81 A

Current at Max Power

45.8 V

Open Circuit Voltage

9.33 A

Short Circuit Current

Physical Dimensions

| Attribute | Value |
|------------|--------------------|
| Dimensions | 1956 x 992 x 40 mm |
| Weight | 22.5 kg |

Design Standards

German Engineered
