

High-Gain Outdoor Digital TV Antenna

This high-gain outdoor TV antenna is designed to receive digital terrestrial television (DTT) signals. It features a Yagi-Uda design with multiple elements for enhanced signal reception, particularly in areas with weak or distant broadcast towers.

Product Overview

High-Performance Outdoor Digital Reception

This high-gain outdoor TV antenna utilizes a specialized Yagi-Uda design to deliver superior digital terrestrial television (DTT) signal reception. Engineered for durability, the weather-resistant construction ensures reliable performance in both urban and rural environments. It is specifically designed to maximize signal strength and minimize interference for clear, consistent over-the-air broadcasting.

Technical Specifications

Signal Performance

High-Gain • Long-Range Reception

Supported Frequencies	VHF, UHF
Antenna Architecture	Yagi-Uda

Construction & Durability

Ideal Usage

- Urban environments
- Rural areas
- Weak signal zones
- Distant broadcast coverage

Environmental Protection	Yes
