

High-Gain Outdoor TV Antenna

This high-gain outdoor TV antenna is designed for optimal reception of over-the-air digital television signals. It supports both VHF and UHF frequencies and is constructed from durable, weather-resistant materials.

Product Overview

Professional Grade Signal Reception

This high-gain outdoor TV antenna is precision-engineered to provide superior reception of over-the-air digital television signals. Utilizing a multi-element design that incorporates reflectors, directors, and a driven element, it effectively maximizes signal strength while minimizing environmental interference. Its durable, weather-resistant construction ensures reliable performance in challenging outdoor conditions, making it an ideal choice for areas with weak signal strength or long distances from broadcast towers.

Technical Specifications

Construction Details

- Multi-element configuration
- Includes reflectors, directors, and driven element
- Weather-resistant materials
- Low wind-resistance profile

Frequency Bands

VHF, UHF

Installation and Compatibility

Assembly Status

Pre-assembled

Mounting Included

Yes

Installation Compatibility

Compatible with standard antenna masts and external structures.
