

High-Gain VHF/UHF Outdoor TV Antenna

This high-gain outdoor antenna receives both VHF and UHF television signals. The multi-element design enhances signal reception for clear and reliable over-the-air broadcast reception.

Overview

High-Performance Signal Reception

This high-gain outdoor antenna is engineered to capture both VHF and UHF television signals with exceptional clarity. Featuring a robust multi-element design, it maximizes signal strength even in challenging environments, making it an ideal solution for areas with weak reception. Built with weather-resistant materials, this antenna ensures reliable, long-term performance for those looking to enjoy high-quality over-the-air broadcasts.

Technical Specifications

Supported Signals	VHF, UHF
Installation	Outdoor
Connection Type	Standard coaxial cable

Features

Build Quality

Weather-resistant • Durable construction

Antenna Components

- Reflector
- Directors
- Driven element
