

High Holding Power Matrosov Anchor

This Matrosov anchor has high holding power. It is available in weights ranging from 100kg to 1500kg and has multiple certifications including ABS, CCS, GL, LR, BV, and DNV.

Overview

High Holding Power Matrosov Anchor

The H.H.P Matrosov Anchor is a high holding power anchor designed for superior performance in various seabed conditions. Its unique fluke geometry and ballast arrangement ensure rapid penetration and secure holding, while the high-strength steel construction offers exceptional durability. Optimized to minimize weight while maximizing holding power, this anchor provides a dependable, efficient solution for a wide range of marine vessels.
