Product Overview

Professional Grade Safety Goggles

These high-impact safety goggles are engineered for professional environments, featuring a flexible PVC frame and a durable polycarbonate lens. Designed for comfort and reliability, they provide essential protection against medium-energy shocks, chemical splashes, dust, and fused metal projections. Their indirect ventilation system helps reduce fogging, while the adjustable design ensures a secure fit for various head sizes.

Standards & Compliance

Certifications	ANSI Z87.1-2020, CE EN 166:2001
Optical Class	1 (Highest)

Technical Specifications

Impact Resistance

120 m/s
Max Velocity

Ventilation	Indirect (4 ventilator hole caps)
