

High-Intensity Bicycle Front Light

This bicycle front light features a CREE XPE-R3 LED and an aluminum interior for continuous, super-bright illumination. Its fish-like design reduces wind resistance, and it is shock-proof and temperature-resistant.

Product Overview

High-Intensity Bicycle Front Light

This high-intensity bicycle front light is engineered for enhanced visibility and safety during nighttime riding. Featuring a durable housing with an internal aluminum pipe, it is designed to withstand continuous use, shock, and significant temperature variations. Its unique, fish-like aerodynamic design minimizes wind resistance, making it an ideal choice for performance cyclists.

Technical Specifications

LED Type	CREE XPE-R3
Construction	Aluminum Internal Pipe, Shock-proof, Temperature Resistant

Design & Features

Color Options Multiple colors available	
Design	Aerodynamic fish-like design
Mounting	Secure handlebar bracket
