

High-Intensity Discharge Power Light

This high-intensity discharge (HID) power light is designed for robust performance in demanding environments. It features a high-output HID bulb for exceptional brightness and long-range visibility.

Product Overview

High-Performance Illumination

This high-intensity discharge (HID) power light is engineered for robust performance in the most demanding professional environments. It features a high-output bulb designed for exceptional brightness and long-range visibility, ensuring clarity where it matters most. With a rugged, impact-resistant construction and an ergonomic handle, this tool is built for both durability and extended, comfortable use in the field.

Technical Specifications

Ideal Applications

- Professional field operations
- Demanding industrial environments
- Search and rescue
- Outdoor maintenance

Lighting Technology

High-Intensity Discharge (HID)

Key Features

High-Output Bulb, Long-Range Visibility, Impact Resistant, Weather Resistant, Ergonomic Handle
