

High-Intensity LED Aluminum Flashlight

This high-intensity LED flashlight is designed for reliable illumination in various applications. Featuring a durable aluminum alloy construction, it offers exceptional impact resistance and heat dissipation.

Overview

High-Performance Illumination

This high-intensity LED flashlight is engineered for reliability and versatility in demanding environments. Constructed from durable aluminum alloy, it features excellent heat dissipation and impact resistance. With adjustable focus and multiple operational modes, it provides tailored lighting solutions for security, emergency, and outdoor professional use.

Construction & Design

Environmental Protection

Water-resistant

Material

Aluminum Alloy

Design Features

Ergonomic Grip, Impact Resistant, Heat Dissipating

Performance

Operational Modes

- High
- Medium
- Low
- Strobe
- SOS

Beam Control

Yes

Power

Power Source

Rechargeable Battery
