

High-Intensity LED Emergency Light

This high-intensity emergency lighting unit is designed for reliable illumination during power outages. It features bright LEDs for optimal light output and extended runtime and is constructed with durable materials for long-lasting performance.

Product Overview

High-Intensity Emergency Illumination

This high-intensity emergency lighting unit is engineered to provide reliable illumination during power outages. Featuring an array of bright LEDs, it ensures optimal light output and extended runtime for critical safety situations. Built with durable materials, this unit is designed for long-lasting performance in both commercial and residential environments.

Technical Specifications

Primary Function

Emergency Lighting • Power Outage Backup

Light Source

LED

Suitable Applications

Commercial, Residential
