

High-Intensity LED Flashlight

This high-intensity flashlight features a durable metal housing. It is equipped with a reflector for enhanced beam projection, suitable for various illumination needs in professional or recreational settings.

Product Overview

High-Intensity Illumination Solution

This high-intensity LED flashlight is engineered with a durable metal housing to withstand demanding work environments. Featuring a multi-LED configuration, it provides superior brightness and an extended service life for professional applications. The textured grip ensures secure handling, while the integrated reflector maximizes beam projection for diverse illumination needs.

Technical Specifications

Key Features

- Textured grip for secure handling
- Advanced reflector for enhanced beam projection
- Extended LED lifespan
- Rugged metal construction

Housing Material	Durable metal
LED Type	Multi-LED configuration

Certifications & Suitability

Target Use Cases	Professional Lighting, Recreational Use, Industrial Maintenance
