

High-Intensity LED Flood Light

This high-intensity floodlight is designed for outdoor applications. With an IP65 protection rating, it resists dust and water ingress and includes a high-efficiency reflector for optimal light distribution.

Product Overview

High-Intensity LED Flood Light

Designed for demanding outdoor environments, this high-intensity LED flood light provides robust illumination for construction sites, parking lots, and security perimeters. The unit features a high-efficiency reflector system to ensure optimal light distribution across large areas. Engineered for durability, it includes integrated thermal protection and a reliable capacitor to maintain consistent performance in harsh conditions.

Technical Specifications

Protection Class

IP65

Capacitor Rating

1 mF

Integrated Protections

Thermal Protection, Dust Resistant, Water Resistant

Applications

Recommended Use Cases

- Construction Sites
- Parking Lots
- Security Lighting
- General Outdoor Illumination
