

High-Intensity LED Floodlight

This high-intensity floodlight is designed for outdoor applications. It features a robust housing with IP65 protection, ensuring resistance to dust and water ingress, and is equipped with a high-efficiency reflector for optimal light distribution.

Overview

High-Intensity LED Floodlight

This high-intensity LED floodlight is engineered specifically for demanding outdoor applications, making it an ideal choice for construction sites, parking lots, and large-scale industrial areas. Featuring a robust, durable housing, it ensures reliable performance and longevity even in challenging environments. With its high-efficiency reflector, the unit provides optimal light distribution, while its IP65 protection rating guarantees excellent resistance against dust and water ingress.

Technical Specifications

Protection Class

IP65

Key Design Features

- Robust housing construction
- High-efficiency reflector
- Dust and water resistant

Capacitor

1 mF

Suitable Applications

Construction Sites, Parking Lots, Outdoor Industrial
